

January-April 2009

Happy “almost new year” from Quilted Treasures! It’s time to complete our many to-do lists and to think about life after the rush of holiday activities. We have a stellar line-up of classes for 2009 and we invite you into our classroom to see many beautiful samples. As always, we have a fantastic beginner program, great “next step” classes, technique classes, challenge classes, and some classes just for fun. Classes are a great way to commit to a project and to renew your excitement for the creative craft of quilting. We’d love to help with your fabric selection and answer questions you may have about the upcoming class projects.

#### Quilt Basics

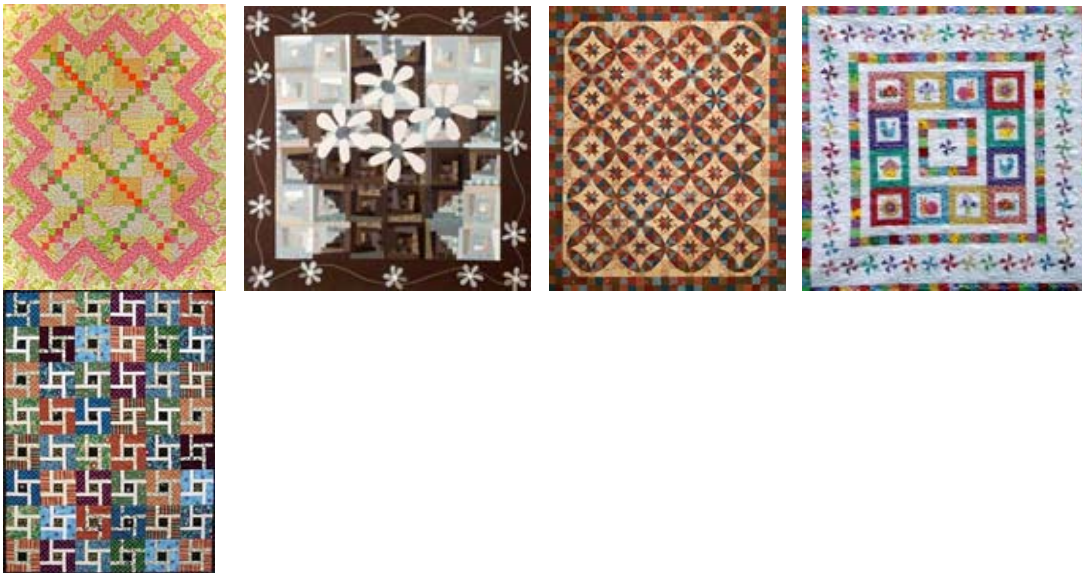

Perfect for beginners or quilters with just a little experience, our Quilt Basics class covers many common methods used in quilting. Included in this seven part class is: rotary cutting, accurate machine piecing, strip piecing, triangle unit methods, paper piecing, log cabin piecing, border application, layering, machine quilting and binding. The most common response from quilters completing this class is that they received superior instruction, had fun, and that they can approach their next quilt project with confidence.
